## MINE STILL BURNING AS FIERCELY AS EVER

ALL MUST BE DEAD NOW

MINE EXPERTS SAY THE COAL IS  
NOW BURNING.

Fire Fighting Apparatus Comes From  
Chicago to Fight the Ever-In-  
creasing Flames.  
(BY ASSOCIATED PRESS.)

Cherry, Ill., Nov. 16.—There is absolutely no hope that any of the miners entombed in the St. Paul mine can possibly be alive this morning. The mouths are sealed and despite this fact the surface indications all point to the fact that the flames are still burning intensely and the heat and gases will have killed any humans who may have survived the first two days.

**Not to Open Today**

The officials and experts say it will be impossible to open the shafts today as no one could venture down with any thought of safety and it would be impossible to bring out any of the bodies, many of whom were seen yesterday by the men who went down equipped with helmets. The gasses will probably not burn out until tomorrow and until then the seals will be kept intact.

**Most Orderly**

The rumor stating Governor Doneen was going to order troops here to preserve order is absolutely without foundation. The little town is perfectly orderly and the sheriff has not considered it necessary to keep his former large force of deputies on duty, reducing the number very materially. Troops will not be needed.

**Relieving Necessity**

The relief committee is working night and day to relieve the necessities of the families who are left behind by the awful calamity. Nurses are going into homes, giving comfort, cooking food furnished by the committee and doing all in their power to alleviate the sufferings of the women and children.

**Preparing for Funerals**

The saddest part of the work of the rescuers is the preparations that are being made for the burial of the bodies of the victims as soon as they can be brought to the surface. Hundreds of coffins ordered by the officials have arrived and are being prepared for the bodies. It is planned to bring the bodies out fifty at a time and have them identified at once to prevent any disorder.

**Rushing Aid**

Offers of aid, both financial and otherwise, are coming from all parts of the state and country and the relief committee is ready to receive all contributions. The personal distribution of the necessities is in the hands of the special committees appointed by the officials of the mine who are doing all in their power. The worst part of it all now seems to be the waiting for the fire to go out, so that the work of bringing the bodies to the surface can begin.

**Takes Temperature.**

Geographical Director Leo of Pittsburgh took the temperature at the top of the burning mine at the main shaft today and recorded the fact that the fire was so intense it would probably be impossible to break the sealed shaft today. **Is Intense.**

Judging from the heat on the surface the heat at the bottom of the shaft must be intense. As there is nothing in the shaft to burn the heat comes from within the mine, three hundred feet below the surface of the ground.

**Smell Gas.**

The smell of gas is apparent near the shaft and this seems a certain indication that the flames have spread from the stables to the coal vault.

**Buried Bodies.**

The funeral of eight of the victims whose bodies were recovered Saturday night, was held today and the surviving miners and families of the dead filed through the streets behind the hearse.

**Taken to Other Towns.**

Several of the dead were taken in funeral trains to Ladd, Ill., and other nearby towns. The officials of the living miners and families of the dead filed through the streets behind the hearse.

**Have Apparatus.**

The fire-fighting apparatus from Chicago arrived here on a special train at noon. An attempt to cool the mine was made at once by lowering a water-spray and turning the water into it.

**Few Seek Money.**

Comparatively few persons had called up to noon for the wages due the miners.

**Have Given Up.**

All further efforts to enter the mine were abandoned at one o'clock this afternoon, because of the great heat. It is decided the coal deposits have caught fire and flames are burning out the timbers of many galleries.

**Special Permit to Wed:** James H. Dugdale of Platteville and Miss Myra Alice Whiffen of Janesville obtained a marriage license and special permit to wed at once, at the courthouse today. The ceremony was to be performed by the Rev. Mr. Catchpole. A license was issued to William Linton of Orfordville and Cora Sperry of Evansville.

**Odd Fellow's Social:** Two hundred members of Wisconsin Lodge No. 14, I. O. O. F., enjoyed a noisy supper, card party and dance last evening. The tables were tastefully decorated for the occasion and Cornelius McNamee served the tempting repast. Afterwards F. H. Koeblin gave a concert with some select phonograph records and Kellogg and Muenhoff furnished the inspiration for the hop.

## BOGUS BUTTER CASE CONTINUES TO GROW MORE INTERESTING

A. E. Graham Was Brought up Before Court Commissioner This Afternoon and His Case Continued.

When A. E. Graham was taken in charge by the Janesville police on Nov. 6 on a charge of selling bogus butter, it was not thought that the case would result in as many complications as have subsequently arisen. Not only has Graham been arrested and fined under the state law, but he is at present under arrest by national officers for violating the national pure food laws, his companion and supposed leader, James H. Davis, is also under arrest and efforts are being made by post office officials to hold the prisoners for trial by the U. S. mails to trial.

Graham's hearing was held this afternoon in the office of Court Commissioner Stanley D. Talmage in the presence of H. H. Morgan, Assistant U. S. Attorney for the Western District of Washington, D. C., C. O. Walden, Chief Deputy Revenue Collector for this district, J. P. Walker, Post Office Inspector of Burlington, Wisc., Boecker Sterne, Internal Revenue Inspector of Milwaukee, and Captain H. S. Vaughan. The hearing was taken up with the reciting of P. P. Downing, chemist for the State Dairy and Food Commission of Madison, who stated that the goods sold as creamy butter by Graham were nothing but oleomargarine and contained no butter fat. After Downing's testimony had been taken, the case was adjourned until Tuesday, Nov. 23, at 11:30 by consent of both parties in order to allow Attorney Edward Yawkey of Milwaukee, who will represent the defendant, to present.

In addition to Graham, who is thought to be only a catpaw for other sharper criminals, the U. S. officers also have James H. Davis, alias Thomas E. Lee and Edward Kline, under arrest. They were taken in charge by U. S. Marshal H. A. Well of the eastern district, but have been released on bonds and will appear on trial Wednesday in Milwaukee. It appears that Lee is simply another name for James H. Davis who left Dr. Schneidler's hospital in Milwaukee where he was undergoing treatment for his eyes, to come to this city and pay A. E. Graham's fine. The officials think that Lee or one who gave his name, Davis, is a ringleader in the oleo graft game and that they can convict him on a charge of violating the pure food laws and may be able to get him for using the mails to doraud.

## ALLEGED CROOK IS TAKEN IN CUSTODY

Man Wanted for Selling Bogus Butter  
Stock Arrested in  
Neenah.

(SPECIAL TO THE GAZETTE.)

Neenah, Wisc., Nov. 16.—Paul Borch, alias Dr. W. H. Carson, was arrested here by Chicago detectives, charged with having jumped his bail and returned to Chicago. He was soon to appear for trial being charged with selling bogus milking stock. The bail was \$4,000, which was furnished by friends, who became alarmed at his long continued absence from Chicago. He had been here a month, was a fully good fellow and paid his bills. A detective shadowed his wife when she came here to visit him and his whereabouts were thereby learned. When arrested he apparently thought the matter was a joke and made a big uproar when placed in custody.

To disprove the statement that the key to the safe for the coming Thanksgiving, the fact is made known that turkeys are being purchased in this part of the state by the ton. Farmers have made contracts to sell many of the birds, one butcher having purchased a lot of three tons of turkeys. The price will not be abnormally high as was predicted.

A large crew of men is employed in laying new rails on the Soo Line between this city and Fond du Lac, the work beginning on this end. Much heavier steel is being laid. It is stated on what is believed to be good authority that this work is being done in preparation for the greatly increased traffic that will result when the Wisconsin & Northern railway connects with this city on the Neenah Shawano division of the W. & N.

**Barney McDonald**, a once prosperous and prominent business man, a banker of Titusville, Pa., was picked up by the police here and taken to the Clark hospital. His condition is serious. In his pocket was found a letter containing a pathetic appeal from his daughter urging him to return home. He states his wife died several years ago and he further states that if he dies, it will be from a broken heart.

**Sheldon Horse on Rampage:** This morning the Sheldon hardware company's delivery-wagon horse became irritated by raucous sounds coming from the tin-shop and bounded down Milwaukee street at a 40 clip. Several made vain efforts to stop the steed as he turned onto Main street with the evident intention of smashing every vehicle and plate glass window in sight. But he suddenly braced his hind feet and slid peacefully into another at the old accustomed telephone pole in front of the store.

**Jailed for Drunkenness:** Louis Caenmerer pleaded guilty to a charge of drunkenness in municipal court this morning and was sentenced to spend five days in jail and pay a fine and costs of \$1 with the alternative of five days more.

**Special Permit to Wed:** James H. Dugdale of Platteville and Miss Myra Alice Whiffen of Janesville obtained a marriage license and special permit to wed at once, at the courthouse today. The ceremony was to be performed by the Rev. Mr. Catchpole. A license was issued to William Linton of Orfordville and Cora Sperry of Evansville.

**Odd Fellow's Social:** Two hundred members of Wisconsin Lodge No. 14, I. O. O. F., enjoyed a noisy supper, card party and dance last evening. Koeblin gave a concert with some select phonograph records and Kellogg and Muenhoff furnished the inspiration for the hop.

JANESVILLE, WISCONSIN, TUESDAY, NOVEMBER 16, 1909.

WILL THEY BE ABLE TO SAVE IT IF IT IS?

News Note.—It is reported that turkeys are dying of appendicitis.

## MURDERER OF FOUR PAYS THE PENALTY

Emil Victor Who Slew Entire Family  
Hanged At Aberdeen, South  
Dakota Today.

Aberdeen, S. D., Nov. 16.—Emil Victor, slayer of the Christie family, paid the penalty for his crimes in the gallows today. The execution took place within a stockade erected in the court-house yard, and was witnessed only by the jail officials, medical examiners and other official witnesses.

Victor's crime was one of the most diabolical in the criminal annals of South Dakota. On July 2 of the present year Emil Victor, a young man, who had been in the employ of John Morrison, a farmer near Aberdeen, brutally murdered his wife, W. Christie, a grain buyer for the Van Dusen Elevator company, at Rudolph, a station on the Milwaukee railroad ten miles south of Aberdeen. Christie's wife and daughter Mildred, seventeen years old, the fourteen year old Michael Royston, son of neighbor of the Christies, it appears from the evidence in the case that Victor had planned to rob Christie and had planned to commit his crime on Friday, in the hope of gaining two days start. He knew that Christie was not start in the habit of running the elevator on Saturday and would, for that reason not be likely to discover the robbery until the following Monday. Victor attacked Christie, while the latter was milking in the barn, and knocked him senseless with a blow with the hammer. Victor had not counted upon the fact, unknown to him, that young Royston was visiting the Christies and happened to be in another part of the barn. When the boy came to the scene of the crime saw Victor standing over his victim, he tried to run away and Victor, knowing that his safety depended upon it, shot the boy down and shattered his head with the hammer. The shot around Mrs. Christie and her daughter and to silence them Victor killed both by shots from his revolver. Then he ran across the barn for valuables and escaped. The quadruple crime was discovered the following day by the father of the Royston boy, who visited the Christies to see how his son was progressing with the work in the potato patch. A general alarm was given and on the afternoon of the day Victor was arrested in a hardware shop at Aberdeen. He admitted his crime, but an effort was made to prove him an epileptic and irresponsible for his action. The evidence against Victor was so strong, however, that the jury found him guilty and he was sentenced to be hanged.

(SPECIAL TO THE GAZETTE.)

Chicago, Nov. 16.—The grand ball room of the new hotel La Salle was crowded to overflowing on the occasion of the twenty-fifth anniversary of his consecration as bishop of Mantua. It was the first bishop of Mantua since the celebration of the Pope's sacerdotal jubilee a year ago. Thousands of the faithful were present, many of whom had journeyed from distant parts of the world. The French pilgrims alone numbered more than 1,000. From America there came a large delegation, composed principally of Knights of Columbus members and their families, under the spiritual direction of Mgr. Keane, Bishop of Cheyenne.

Thousands of tickets had been distributed for the ceremony and a dense crowd packed the corridor, hall and tribune, and reached almost to the foot of the throne, itself, while the plaza of St. Peter's was a moving mass of men in black with laurel wreaths, men in dress clothes, priests, soldiers, monks, carabiniers, nuns, spectators and cardinals. Special envoys, all clad in brilliant uniform, were present from Spain, Portugal, Bavaria, Austria-Hungary, Germany and several other countries.

Plus X entered in procession, preceded, accompanied and followed by the cardinals and the guards, the dignitaries of the court and church. The Pope was dressed in complete pontifical robes, mitre on head, and with raised hand in the familiar position he gave blessing as he went. There were more than thirty cardinals and several hundred bishops. In the procession, and their large variety of rich costumes formed a magnificent spectacle.

Cardinal Rambolla, as the archpriest of St. Peter's, received the Pope at the entrance to the basilica. His holiness mounted the throne amidst a profound silence, the cardinals taking the positions prepared for them. The choir of the Sistine Chapel rendered the music. The Pope celebrated mass at the high altar, standing above the shrine of St. Peter. The ceremony over, the Pope rose and after bestowing the apostolic blessing slowly withdrew, the procession reforming as an escort. The brilliant ceremony was witnessed by the sisters of the Pope, who occupied a special box.

**Farm Chiefs of the South:** Jackson, Miss., Nov. 16.—Scientific farming in all its branches is to be discussed at the annual convention of the Agricultural Commissioners of the Southern States, which began a three-day session in this city today. The attendance includes the commissioners of Florida, Georgia, the Carolinas, Virginia, Alabama, Louisiana, Mississippi, Texas, Arkansas and Tennessee, together with representatives of the United States Department of Agriculture, State chemists and heads of agricultural colleges and experiment stations. H. E. Blakely, commissioner of agriculture of Mississippi, is the presiding officer.

**Java Dairymen in Session:** Cedar Rapids, Ia., Nov. 16.—Quebec dairymen and those engaged in handling the products of the dairy farm are to be dealt with at the annual convention of the Quebec State Dairymen's association, which began here today. The association, which opens here tonight, President W. B. Barney of Hampton and other officers of the association, together with members from all parts of the state, are here to take part in the four days' session.

## FORMER JANESEVILLE MAN NEAR TO DEATH

James Monahan of Beloit beaten Al-  
most to Death Today—Crucified  
in Belt at Shop.

(SPECIAL TO THE GAZETTE.)

Beloit, Wisc., Nov. 16.—James H. Monahan, aged 51, formerly of Janesville, a workman at the Furbanks Morse plant, met with terrible injuries this morning. He became caught in a belt and nearly had the life beaten out of him. He was rendered unconscious and taken to the Emergency Hospital and while he has rallied some since he has been there his condition is still critical. His bones were broken and punctured the lungs, a shoulder was dislocated and an arm paralyzed. His wife and Father Hanz have joined him at the hospital. The man is well known in Janesville.

Jail Too Good for Him

Leonard Bleaney, a young man, was sentenced to the state penitentiary for two years by Judge Rosa for the rape of young girls. One of Bleaney's several victims made complaint against him and he was brought into court. He pleaded guilty and was terribly arraigned by the judge, who declared he was one of the worst scoundrels who ever came into the court. Bleaney served a short term in the Michigan prison for a like crime.

Wife-Beater Sentenced

Harry Mehan, a wife-beater, was this morning sentenced to the state penitentiary for one year for a brutal assault on his wife on Monday.

(SPECIAL TO THE GAZETTE.)

## GIVEN A SENTENCE FOR MANSLAUGHTER

Man Who Had a Gun in Wood Was  
Sentenced.

(SPECIAL TO THE GAZETTE.)

Merrill, Wisc., Nov. 16.—Judge A. L. Teller this morning pronounced sentence against Robert Zimmerman of this city, charged and convicted of having set a gun which cost the life of a man on the 31st of October, 1908.

The evidence showed that Zimmerman and a few companions went to Knut's Clearing, 14 miles from here, on Oct. 31, 1908

## Men's Neckwear

## Link and Pin

Chicago, Milwaukee &amp; St. Paul.

WRECK ON CROSSING  
CAUSED MUCH DELAY

Tank of Engine 1752 Was Derailed at St. Mary's Ave., Last Night About Ten O'Clock.

Just received a wide range of the newest patterns of neckwear. Make your selection while our stock is complete.

**SPECIAL** — Wide four-inbands, extra quality silk, open or closed end, panel or corded stripes, polka dot with silk stripe effect, floral patterns, in all-over designs, regular 50c ties, special 35c each or 3 for \$1.00.

Chicago, Milwaukee &amp; St. Paul.

WRECK ON CROSSING  
CAUSED MUCH DELAY

Tank of Engine 1752 Was Derailed at St. Mary's Ave., Last Night About Ten O'Clock.

Both freight and passenger traffic on the St. Paul were badly muddled up last night and this morning for various reasons. Last night about ten o'clock while Engineer Allen and Fireman Siebert were bringing in a single passenger coach on the return trip of the first day run with engine 1752, the tank and coach left the track at St. Mary's avenue where a section gang had recently been making repairs. Although the damage to the engine and coach was considerable, the track was badly torn up and it was found necessary to send to Milwaukee for the steam wrecking outfit to clear the right of way. The wrecker which was brought through by engine 2045, cleared the track after about three-quarters of an hour's work but it was fully twelve hours after the accident before the tracks were repaired. Immediately after the derailment, Engineer Allen brought the 1752 without the tank to the house and finished the run with engine 850. This morning on account of delays to the Mineral Point passenger, number 21, all the morning passengers were held up for over an hour and a quarter. Trains 8 and 421 were held until after 11:30 when orders were received with regard to the place to meet 21 and 421. The wreck last night delayed only the time freight, 16c.

Engineer Mead and Fireman Himmel, who were on the switch-engine yesterday, double-headed Engine Cornelius and Perry Kuehling out on 165 this morning with engine 1255.

Engineer Higgins and Fireman Dooley brought in an extra last night from the east, with engine 1257, and took the switch-engine, 1048, this morning, which was afterwards sent to the house for repairs to the air pump.

Engineer Webber and Fireman Green on the "three spot," and Engineer Rhoda and Fireman Killeney on the 1048 were switching last night.

Engineer Hillerayer and Fireman Nugent took an extra east last night at 11:30 with engine 178.

Chicago &amp; North-Western.

## NORTH END WAY FREIGHT • DERAILED AT MILTON JCT.

The north end way freight, number 11, piloted by Engineer Pruner with engine 600 was derailed at Milton Junction last night. Conductor Kyle and Engineer Hager, with engine 374 took the wrecking outfit to Milton this morning to replace the engine on the "racks." Machinist L. L. Hoffman accompanied them to do some necessary and delicate work on the engine.

**ARGER STALLS MAY BE ADDED TO ROUND-HOUSE**

There is a rumor afloat, as yet unconfirmed, that the road will add several stalls to the round-house or at least make improvements to the present house in order to accommodate the new passenger and freight locomotives which are arriving daily from the south. No alterations will be necessary to the turn-table for the passenger engines but if the freight locomotives are to be accommodated, the table will have to be made larger.

Car A 1140 has been sent from the Waukesha shops and is on the road to Janesville where it will be used as a bunk car.

Engineer Ryerson took out second 114 this morning with engine 1748.

Fireman Fowler reported for work on 300 and 315 this morning. Fireman Fleming, who has been following him, is on the board.

Fireman Grantham is on the half and half switch-engine today in place of Fireman Dalton, who is laying off.

Engineer Cole reported for work on the board this morning after a short lay-off.

The call boy at the new yards has imitated his coworker in the city, which makes two now overeats. At the same time, a south-end brakeman is in mourning. He was unguided enough to leave the caboose door open and his overcoat on the bench. It is an unusual coincidence to say the least, as engineer S. O. Dudley would say.

Engineer Cole reported for work on the board this morning after a short lay-off.

The call boy at the new yards has imitated his coworker in the city, which makes two now overeats. At the same time, a south-end brakeman is in mourning. He was unguided enough to leave the caboose door open and his overcoat on the bench. It is an unusual coincidence to say the least, as engineer S. O. Dudley would say.

Engineer Ryerson took out second 114 this morning with engine 1748.

Fireman Fowler reported for work on 300 and 315 this morning. Fireman Fleming, who has been following him, is on the board.

Fireman Grantham is on the half and half switch-engine today in place of Fireman Dalton, who is laying off.

Engineer Cole reported for work on the board this morning after a short lay-off.

## MAKING A NEWSPAPER

"Men who make newspapers sometimes believe that their profession is an exciting one. They are wrong. It is the dullest calling. Making a newspaper is an easy task. Anybody can do it."

A lawyer with only a diploma and a brass sign, who would lose a suit even if the other side was ready to confess judgment, will tell you how to run a newspaper. A physician who would send his patient to the morgue before the prescription has been filled will know all the fine points of making a newspaper. An actor who never earned any other plaudit than a soft tomato will give instructions in handling the world's news. Any old lady who knows enough to get off a street car backward has positive opinions on the press. Even a society person who never paid anything but a call, or made anything but a visit did anything but tell who writes stories, didn't copy, wrote with 'heads' that won't fit, and got the paper out on time.

"One reason for the universality of perfection in this trade, among those who do not work at it, is that everybody has been employed in it. It is a most unusual thing to meet a man who, when the occasion occurs, will not say, 'I used to be a newspaper man myself.' Every time a man works his county editor for a puff on the strength of big pumpkin he graduates in Journalism. When he writes a 'piece' for the Squash County Clarion about a most enjoyable entertainment, he completes his post-graduate course in newspaper work, and when he writes a communication on both sides of the paper to the editor he becomes a thirty-third degree member of the Tribe of Scribboes."

"That 'so many men' have abandoned literature for the law, medicine and other easy walks of life simply shows that 'many men would rather fall in one thing than another.'—Washington Star."

This may seem a little sarcastic, but it's true to the letter. The making of a newspaper is a task so simple that the average brain does not hesitate to tackle it on the other fellow's capital and the management is frequently reminded of what would be done if I was in control."

Many of these well-meaning people are possessed of the notion that the mission of a paper is to reward friends and punish enemies. In other words, that it is a personal organ. This is so far from the truth that the man who adopts it as a policy soon discovers that he has selected a short route to grief. The making of a successful newspaper is as much of a business that the men who have been at it the longest find that there is still much to learn."

## JAPANESE BANKING

A San Francisco paper thus describes the Japanese banking system:

"Japanese banks are peculiar at home and, when transplanted to America, do not always lose their native traits. There is a recent and perfectly authentic case of an American gentleman who wanted to borrow \$2,000 with which to buy more curios in Japan, and, having no ready security, went to the manager of a bank in Toledo and asked for a loan on his word. He looked reputable, but the loan was made because of the use he meant to make of the funds. With

the bizarre partition of his race, the banker argued that, even if the \$2,000 were never paid back, it would help out the business of Japan and could be charged up as a patriotic offering. Happily there was no national bank inspector to object, and the deal, however it violated banking principles, was a profitable one.

"But the artless and happy-go-lucky ways of Japanese finance do not work well in America, hence the recent official closing of eight out of ten Japanese banks in California. These institutions were come-and-go banks which should have been run to the music of the samisen and under the patronage of the geisha, for the money taken in was allowed to flow out like hot tea at a cherry-blossom dance, and into enterprises, more or less irresponsible, in which the bank officers had invested. Strange to say, no explosions followed, and it may be that the little brown flanchers would, but for the new banking law, have kept merrily on for years, watched of the god of wealth and harming nobody. Who can tell? No one, unless he has dappled Japanese character, can presume to say whether the method would have been changed."

## THE AGE OF GOLD

"This is beyond comparison the age of gold. One-third of all the gold that has been mined since Columbus found the Americans, has been dug from Mother Earth this year. Since gold is the measure of value for all things, the effect which must be produced upon the price of every known commodity, by this stupendous outpouring of the metal is very great and also worldwide. It is obvious that the result of increasing so rapidly the supply of gold, which is the universal yardstick of values, is to increase with nearly equal rapidity everything which it measures. Take away gold and the values drop, but swell the quantity of gold known to be in existence and values leap upward again."—Philadelphia Press.

The danger of having too much gold is a new problem for financiers, . . .

## MORE THAN HONESTY NEEDED

"It cannot be too often repeated that for every three dollars the city of New York loses by theft, it has lost seventeen dollars by incompetency. And yet we have arrived at that stage where an employee of the city who does not actually steal is considered to have established an indefensible claim to his position. The fact that he does nothing, and does it badly, or tolerates bad work in others which would mean his summary discharge in private employment, goes for nothing."

This plain statement from a New York financial journal tells the whole story of municipal misrule—not dishonesty but incompetency, not the cutting down of taxes but the waste of money through loose and careless methods which no private business would tolerate. The commission plan of government regulates this evil of incompetency and for every dollar spent produces a dollar in results.

The men who work in places of danger soon become indifferent and frequently careless and as a result accidents are constantly occurring. The mine at Cherry, Illinois, which is now the sepulchre of 300 men, was lighted by electricity. Something happened to the wiring system and torches were temporarily installed. One of these exposed lights came in contact with a load of hay and almost instantly the whole place was ablaze. Then commenced a fight for life which will never be recorded, for not a man escaped. Somebody made a mistake as the result of carelessness and indifference to danger.

## THE INSURGENTS

"The Insurgents" who are so frantically happy over the election results in Massachusetts, and who ascribe these results to the tariff, overlook the fact that Governor Draper's small majority was due to personal popularity with the labor vote. Two years ago he vetoed an eight-hour labor law, and organized labor has been after his scalp ever since. This was the tariff issue so much exploited by the guardians of the "dear people."

## SICKNESS AND DEATH

Sickness and death may be an error, as claimed by the Christian Science church, but it didn't prevent Thomas Wolfing, a "Science" lecturer, from dropping dead on the platform while addressing an audience at Santa Clara, Cal., not long ago. The old Biblical statement, "It is given unto man once to die," applies to all creeds and no creed, and it is a fatal error to disregard the fact.

## THE PETITION

The petition presented to the mayor yesterday does not mean the adoption of the commission plan of government. It simply means that an election will be called within 60 days for the purpose of submitting the question to the people, if the measure carries a primary election will be held 20 days before the election next spring to nominate a mayor and two commissioners.

## TWO HUNDRED WIDOWS

Two hundred widows and one thousand fatherless children in the strictly mining town of Cherry, Illinois, call for practical sympathy, and the people of the west are generously responding. The Gazette will represent the Red Cross society in the city and forward money contributed.

## JANESVILLE IS THE FIRST CITY

in the state to take action on the commission plan of government. This is a compliment to Senator Whitehead, who fathered the measure and had much to do with its becoming a law.

## PRESS COMMENT

CERTAINLY IT CAN.

The Evening Wisconsin wants to know, "Can the grade of Wisconsin tobacco be improved by selecting new

varieties for planting? Badger growers are interested in the problem, and have the cooperation of the college of agriculture of the university of Wisconsin. Last spring the college distributed no fewer than 2,000 sample packages of improved seed, and it is said that 70 per cent of this year's crop was grown from seed thus obtained. Upon the results no growers report them will depend future efforts to improve the quality of the crop."

## TALK GOOD ROADS.

Up at Menasha the Record remarks: "The county board is in session. In this connection we should like to recommend roads, good roads, for Wisconsin."

## GOOD FOR DROWN COUNTY.

The Green Bay Gazette takes great pleasure in announcing that "Brown county during the past year has spent over \$21,000 for road improvements, if the work is of a permanent nature, it was money well spent."

## DECIDEDLY SO.

The Milwaukee Sentinel forgets that even the Mississippi river has been moved when it says, "The making of a bayou of a great section of the east side wasn't so bad, but to divert the Milwaukee river in order to make a street is rather dreamy, isn't it?"

## HERE IS A GOOD ONE.

The Milwaukee Journal suggests that "It would help at the next primary election if citizens would refuse to sign the nomination papers of men who are not qualified for the office which they are seeking."

## LIKE THE BIG MUDGY.

The East Claire Leader has discovered that "The Fox river, from all reports, turns blue, green and muddy color. Up in this old Chippewa sticks to its dirty brown sugar color but gets there just the same."

## GOOD GRAFT.

Up at Waukesha the Record-Herald states that "Farmers have been selling housewives, who did not know better, bags of potatoes containing a bushel, and a half for two bushels. Truly the 'green' farmer is a thing of the past. It is the people who need to cut their eye teeth in self-protection."

## NO SURPRISE AT ALL.

The Milwaukee News shows no surprise in "The announcement from Madison that Governor Davidson proposes to fulfill his part of the program and call a special session of the legislature to complete the work of the regular session need occasion no surprise. Though the governor has been loath to burden the state with an extra session he recognized that he is in honor bound to carry out the understanding under which the legislature after appointing joint committees to investigate important questions for report at a special session was to adjourn before completing its labors. That obligation resting upon him he will be in no way responsible for the expenditure incurred."

## HE CERTAINLY WOULD.

The Antioch Journal says: "Heard as a senator would be a credit and a help to the state. Push' a good thing along."

## FOR HIMSELF AS WELL.

The Chippewa Falls Independent is in error when it says that it does not believe Governor Davidson is again anxious for a renomination and if he is again pressed into service it will be because the politicians are aware of his great strength among the people and want him to again put them through. It is because he has made a good governor he is wanted.

## THEY HAVE DECIDED.

The East Claire Leader answers its own query when it says, "It's up to the people to decide whether President Taft has done his duty or not." They have decided.

## THE TURNING

"The turning which was a dirty worm shamed; for no one else could see the stage when little Mary came. And the usher got a hook and tied it to a rope, and climbed upon a fire escape and tried to reach the top. He vainly poked and reached and stretched, and climbed and clung and clung, but could not reach across the vast expansive purple rim. And still the hot sheet glow of gloom upon the festive scene; men simply could not see the show behind the gauzy screen. 'Why does she wear an acrobat, upon her empty head? Why not upon a rod or two?' the angry people said. Then up spoke Mary to the crowd, and thus she proudly cried: 'I wear nothing on my head because I've nothing much inside.'

## NEW ELECTRICAL VACUUM.

A new form of electrical vacuum motor has recently been devised. It possesses a distinct advantage over other electric vacuum motors in the fact that it requires no instrument for measuring the current resistance or intensity.

## READY TO MAKE SOCIAL BOW.

The top photograph is a likeness of Ingeborg Gude, the next is Miss Sigrid Gude and the lower picture is of Miss Ruth Wayne.

WASHINGTON, D. C., Nov. 11.—Three very prominent girls are being groomed for their grand entree into society, Miss Ruth Wayne, daughter of Robert J. Wayne, consul general to London. She is a famous linguist and one of the most beautiful girls in Washington. The Misses Ingeborg Gude and Sigrid Gude, daughters of the minister to Norway, will also come out this winter. They are both accomplished musicians. These three girls, their friends declare, will play a striking part in the season's society functions.

They're right in quality, style and fit; and we guarantee complete satisfaction with every pair.

## WHO IS BOSS?

Who is the boss of the schoolroom? The teacher?

If so and the issue is raised between your child and the teacher, then you should back the teacher, and not your child.

You should do this because it is best for the child.

More important than arithmetic or geography or language is obedience. Your child should acquire the habit of doing, without question or parley, that which is ordered by competent authority.

Else its education will fail.

Respect for authority is a fundamental thing in human character. It is the foundation of all good citizenship.

Possibly you have properly taught your son or daughter. If so, it is well; otherwise the teacher will have trouble. And when the trouble comes you must be careful to uphold the teacher.

The father of the writer of these lines used to say, "If you get whipping at school, remember that you get another at home." And the warning was no idle threat.

The proceeding was Spartan-like, but it worked.

In the old days the question as to who was boss in school was usually determined on the first day of the term. If the new teacher could be frightened or whipped by one of the big boys, if by some method the teacher could be shut out of the schoolroom and kept out, the schoolmaster would just as well quit. The school was boss, and the teacher's authority was at an end.

If, on the other hand, the teacher was physically able to fight his way to pre-eminence he was considered competent and there was very little trouble thereafter.

Times have changed, and the average schoolteacher seldom finds occasion to resort to his fists in order to demonstrate his fitness to govern.

But human nature has not changed.

There is the same need that boys and girls should receive discipline.

It was formerly thought, for instance, that none but bad boys should be sent to a military school, whereas it is now conceded that attendance at this kind of school will benefit any boy.

And along with the lessons of personal neatness and system—and love of his dog—the one great lesson learned by a boy in a military school is that of respectful, instant, unquestioned obedience.

## ELBERT HUBBARD SAYS

DEATH SUMMONED  
GOOD PHYSICIANIN HEIGHT OF BRILLIANT AND  
USEFUL CAREER.

## DR. QUINCY O. SUTHERLAND

Passed Away Shortly Before 11 A. M.  
Today After Brief Illness With  
Neuralgia of the Heart.

To the many who shared the high regard for him as counselor and friend, to the community which honored and revered him as a successful practitioner and substantial citizen, to the state at large which was appreciative of his untiring effort in the organized warfare on disease, the tidings of the sudden death of Dr. Quincy O. Sutherland came as a terrible surprise and shock this morning. Only the members of his immediate family, a few neighbors, and Dr. James Gleibrook who was summoned to the sick chamber, had known that he was dangerously ill. As recently as yesterday he attended to a call at Milton and drove several miles into the country. When he had completed his duties for the day and reached the home at 329 South Second street about nine o'clock last evening, he complained of one of those acute pains in the heart which had overtaken him, while ascending the hill or walking too rapidly, at various intervals during the past ten years and on more than one occasion within the last fortnight. It was in keeping with the innate nobility of his character to endure physical discomfort with fortitude and in silence, and he permitted no one to become alarmed regarding his condition until near midnight when the suffering became intense. He died shortly before eleven o'clock this morning of neuralgia of the heart. Grief-stricken remained with him and the end came peacefully with those who were near and dear to him gathered at his bedside.

The deceased was born April 13, 1888, in the town of Fitchburg, Dane county. The father, Chester Sutherland, had come from New York to Wisconsin while a young man and had originally located in Milwaukee. Subsequently he purchased a 320 acre farm situated four miles from Madison and died there in 1889 at the age of seventy-four. The latter's grandfather was a soldier in the war of 1812. Both Chester Sutherland and his wife were of Scotch ancestry.

Quincy O. Sutherland was the second in a family of six children. He was graduated from the academic department of the University of Wisconsin with the class of 1871 and thereafter took up a course of medical study at Hahnemann college, Chicago, receiving his degree from that institution in 1873. Excepting a brief period spent at Monroe, he had been engaged in the practice of medicine at Janesville ever since. In his later career he served several terms as president of the Rock County Medical society; held every office in the Wisconsin Homeopathic Medical society; was prominently identified with the American Institute of Homeopathy, the American Public Health association, and the Pan-American Public Health association; and was at the time of his death a member of the Wisconsin State Board of Health and the Lake Michigan Sanitary Commission. He had also rendered valuable service to his home city as president of the board of education and took an abiding and active interest in all that pertained to the community's welfare. Dr. Sutherland was a Master Mason and a devout member of the Congregational church.

He was married on December 10, 1873, to Miss Addie Green, a daughter of Timothy and Jane (Jessup) Green, and the wife and three children survive him. The children are: Dr. Charles Sutherland and Dr. Frederick Sutherland who had latterly been associated with their father in his Janesville practice, and Mrs. Frank McElroy of Spokane, Wash. Attorney George G. Sutherland of this city and Henry Sutherland of Madison are brothers and Mrs. George Gill of Madison is a sister.

Funeral services will be held at the home on South Second street at two o'clock Thursday afternoon.

Constantinople is the dirtiest city  
in the world, the only street cleaners  
being the starving dogs, cats and rats;  
but the people do use soap. Last  
year there were imported into that  
city 3,600 tons of soap sailing from  
20 to 40 cents a cake. Practically all  
the soap of Constantinople arrives  
from the island of Mytilene, which  
makes 32,000 tons a year from its  
olive oil.

Dr. Chamberlain, U. S. A., says that 60 per cent. of southern-bred soldiers have hookworm disease, and of many new recruits the percentage is at times as high as 85. Southern recruits are less well developed physically than northern ones.

## Ravages of Hookworm.

Dr. Chamberlain, U. S. A., says that 60 per cent. of southern-bred soldiers have hookworm disease, and of many new recruits the percentage is at times as high as 85. Southern recruits are less well developed physically than northern ones.

THOMAS J. ZIEGLER  
IS CALLED BY DEATHPassed Away at His Home in Chicago  
After an Illness of But  
Six Months.

Thomas Jefferson Ziegler, who has been associated with Janesville's business affairs for twenty-five years, died last evening at his home, 4649 Woodlawn avenue, Chicago, after an illness of but six months. Mr. Ziegler came to Janesville from Port Byron, Ill., in 1858 and associated himself with Henry T. Pitcher in business. They remained in partnership for two years when Mr. Pitcher retired, removing to Kansas City. Mr. Ziegler continued the business until 1891 when he removed to Minneapolis, taking charge and opening the large store for Brown King & Co. in that city. In 1891 he retained his business interests in Janesville, later forming a stock company to handle it. In 1891 he removed to Chicago and has since made his home there, however being a frequent visitor to Janesville. It was on his last visit in April of the present year, that he contracted the cold which was the beginning of the illness that carried him away. He leaves to mourn his loss a widow and one daughter, Mrs. Ward S. Leverett of Minneapolis. The funeral will be private and will be held on Thursday morning from his late residence in Chicago. Those who knew Mr. Ziegler loved and respected him. He was a man of sterling qualities and had many warm friends in Janesville who have anxiously watched his last illness for some ray of hope of his recovery. Liberal and generous, he has always considered Janesville as his home city and looked to its advancement and improvement. He has kept in close touch with local affairs and his frequent visits here have made him almost a permanent resident. The many friends and acquaintances will unite with his wife and daughter in their mourning for a departed friend.

## PERSONAL MENTION.

Mrs. Robert Abell of Portage, who has been visiting with Mr. and Mrs. A. E. Drotting, 10 East street, has returned to her home.

Mrs. William Morris of Madison street is confined to her home with illness.

Mrs. Gladys Brown has been spending the past few days with her grandmother in La Prairie.

C. E. Merrill of Waukesha was in the city yesterday.

Ed. J. Rival of Milwaukee transacted business in the city yesterday. Jay Gertson of Madison was in the city yesterday on business.

S. Ferrell of Beloit spent Sunday in the city.

C. H. Sylvester of Rockford transacted business in the city yesterday. O. Hane of Stoughton was in the city Monday.

F. F. Nicholson left yesterday on business trip in the west.

M. A. Homola of Stoughton was in the city yesterday.

Stanley Lyle of Madison spent yesterday in the city.

F. G. Kewin of Waukesha was in the city yesterday.

C. H. Belton of Stoughton was a Janesville visitor Monday.

F. G. Conkle of Waukesha transacted business here yesterday.

Mrs. Julia Eddin and Mrs. L. D. Jerome left this evening for Los Angeles.

F. W. Jordan left this morning for Iowau, S. D.

Mrs. Clarence Meeks was in Chicago on Monday.

Born to Mr. and Mrs. Goo, E. Blackford, 306 Cherry street, a son on Sunday.

Born to Mr. and Mrs. Louis Hager, 429 South Jackson street, a son on Sunday morning.

Those who desire to accompany Prof. Moenagh to Beloit this evening will meet at the Interurban station at 7 o'clock.

Hand Dance to-night.  
Our \$9.50 Sharkling coat. Archie Reid.

Regular meeting of Janesville Lodge No. 25, B. P. O. E., will be held this evening. The final report of the memorial committee will be read and other important matters will come before the lodge. Every member is requested to be present. C. B. Evans, E. R.

Dance to Harp Waltz with her to-night, at the big Hand Dance. Circle No. 4 will hold a thumb party at the home of Mrs. A. W. Hall, 115 Locust street, Wednesday afternoon at 2:30. A cordial welcome to all ladies. Mrs. E. J. Bennett, president.

Regular meeting of W. C. T. U. will be held Wednesday at 2:30 p. m. Mary Klinbom, mission, 115 Locust street.

Sample suits embodying new style touches, at 25c off. T. P. Burns.

At the Hand Dance to-night, See the new Electric Effects, arranged by Mr. Claude Fredendall, Electrician.

Circle No. 5 will meet at the home of Mrs. Rutter, 614 Center street, at 2:30 on Wednesday. Mrs. Parker, president.

Extra large and very heavy fleeced cotton blankets in white, gray and tan, at \$1.00 a pair. T. P. Burns.

Lifts you off your feet, when the Big Military band plays, 2 Steps, at Hand Dance to-night. Ticket 75c.

Regular meeting of Rock Council No. 736, F. A. A., at S. W. V. Hall, Tuesday evening at 8 o'clock.

Blanket Sale 40c to \$1.75, the best for the money. Archie Reid.

It is worth remembering that Lyle sells only planes of standard make.

New York furns the best for the money. Archie Reid.

The Brighton night shirts made of best quality of toweling, cut extra wide and full, nothing to equal them at the price, \$1.00. T. P. Burns.

Show the Bearded Lady, the Baby Show, Mary Quite Contrary and her Doll, Doll Rack, Exhibit of Old Fashioned Fancy Work, and many other new attractions at the Mid-Winter Fair of the Baptist church.

A SCRATCH ON ARM  
CAUSES TROUBLE

Verne Merrill Is Slightly Better, Although Improvement Is Slow.

The condition of Verne Merrill, who for several days past has laid at the point of death at Mercy Hospital, was reported to be unchanged this afternoon. He suffered from a chill this noon, but was somewhat better after it.

Blood-poisoning is the cause of the young man's condition, and was brought on by a small scratch on the arm received in a football skirmish. Nothing was thought of it until the arm began to swell and then the youth was removed to the hospital. The bone was scraped and he was apparently getting along fine and it was thought that he would be removed to his home sometime this week. Then last Saturday came the sudden change and it was feared that he might not live the night through. He rallied from this attack, however, but since then there have been anxious times for his friends when his condition was worse.

BIRCH'S SUCCESSOR  
HAS BEEN SECURED

George Wheeler of Milwaukee Will Take Up Physical Directorship at Y. M. C. A.

George Wheeler of Milwaukee has been secured by the committee of the Y. M. C. A., who have charge of the selection of a new physical director, to fill the vacancy caused by the resignation of F. E. Birch. The new man will come here and will take up his work next Monday, when Mr. Birch's resignation goes into effect. Mr. Wheeler is at present engaged in Y. M. C. A. work in the cream City and has had nine years of experience. The committee was given full power in picking the man.

## OBITUARY.

G. A. Griffey

G. A. Griffey, aged seventy-five years, died last night about twelve o'clock at his home, 1012 Bennett street. The deceased wife born near Conneaut, Erie county, Pennsylvania, in 1833 and came with his parents to Wisconsin in 1847, who settled near Johnson Creek. Mr. Griffey was married to Miss Rebecca Schoonover, November 3, 1864, and they resided at Johnson Creek until 1880, when they took a farm near Janesville. In 1894 they moved to this city. He leaves, besides a widow, five sons—G. M. of the town of La Prairie; W. J. of Fort Atkinson; Gus L. of Milwaukee, and H. A. and Myron Griffey of Janesville. The funeral will be held from the home Thursday at 11:30 a. m. The remains will be taken to Johnson Creek for interment.

James W. Tiffany

James W. Tiffany died Monday afternoon at 5:30 after an illness of ten days with pneumonia. He is survived by a wife. The funeral will be held Wednesday afternoon at two o'clock from D. Ryan's undertaking rooms, Interment in Oak Hill cemetery.

## RESUMES PRACTICE HERE

Dr. Frank W. Van Kirk has just returned from Chicago to take up the practice of medicine and surgery in Janesville with offices in the Jackman block.

Dr. Van Kirk is a graduate of Rush Medical College, Chicago, and spent a year abroad in Vienna and Berlin after taking his degree at Rush.

While in Chicago Dr. Van Kirk spent twenty-eight months in St. Luke's hospital and five years in general practice with the well-known Chicago surgeon, Dr. T. J. Watkins.

## Rebukah Dancing Party.

The fourth of the series of dancing parties will be held at East Side Odd Fellows' Hall, Thursday evening, Nov. 18. All holding invitations are cordially welcomed.

## Montreal's Growing Business.

The annual report of the Montreal harbor commissioners says that Montreal is now handling a greater volume of business monthly than any other North American port except New York.

## TRUST MUST PAY FOR ROBBERY

AMERICAN SUGAR REFINERY OF-  
FICIALS WILL BE PUNISHED  
FOR ROBBERIES.

### CABINET TO TAKE ACTION

Claims Will Be Pressed Relentlessly  
If It Means Annihilation of Corporation—Government Official Promises Astonishing Sensation.

Washington, Nov. 16.—That he has sufficient evidence in his possession to punish one or more officers and a number of directors of the American Sugar Refining Company for completely in the wholesale robbery which the concern is alleged to have perpetrated at the port of New York for many years is the conviction of Attorney General Wickesham.

The cabinet at its meeting to-day will go over that phase of the case and it is expected that the attorney general will be directed to bring those individuals into court at his earliest convenience.

There is an unmistakable atmosphere of high tension at the department of justice and the treasury department. Developments are following each other with startling rapidity.

Results Will Be Sensational.  
It was declared by an official who has kept in touch with the investigation that the ultimate exposure will astound even those who have been expecting the most sensational result.

Reynolds Defends Prosecution.  
James H. Reynolds, formerly assistant secretary of the treasury, and now a member of the new tariff board, declared there never had been any attempt on the part of the American Sugar Refining Company to influence any action of his and no instructions had been issued by him having any object in view beyond good administration and fair dealing to all concerned.

Mr. Reynolds' statements were made as the result of publications to the effect that the treasury department under the administration of President Roosevelt displayed apparent indifference in procuring evidence of alleged "sugar trust" frauds, and that Richard Parr, a special agent of the department, in his investigations had encountered obstacles from the outset.

Shorn of all legal verbiage and avoiding all circumspection, the attitude of the government against the American Sugar and Refining Company is this:

Every cent legally due the government by reason of false weighing shall be collected, even if the payment of the money means the financial annihilation of the trust.

Every person in any way connected with the trust against whom evidence of complicity in the crime can be secured will be sent to the penitentiary if possible, without respect to the character of the position or the job held.

### Will Be No Let-Up.

It can be said with authority that President Taft, Secretary of the Treasury MacVean and Attorney General Wickesham have reached the unanimous determination to press relentlessly the inquiry as to the trust's criminal conduct. Every person engaged in the investigation is invited to his greatest endeavor by the knowledge that the wringing of more millions of ill-gotten gains from the trust and putting some of its officers behind the bars will be considered a crowning achievement of administration officials.

### Get Every Dollar Due.

To put the matter in the light of politics, as well as law, a high government official declared:

"There will be nothing left of the trust when we get through with it; we will get every dollar due, punish the guilty and show that the Taft administration can accomplish what the former one did not."

### AN HONOR ESCORT FOR GOMPERS

Federation Delegates May Accompany  
Him to Cell.

Toronto, Ont., Nov. 16.—An escort of honor, composed of all the delegates to the convention of the American Federation of Labor, was proposed for President Gompers and his associates when they go to Washington to give themselves up to the courts to serve their sentences for contempt of court. This suggestion followed the receipt of a telegram from Washington announcing that the court of appeals had refused to grant the stay of proceedings asked for by the labor leaders.

The news from Washington created consternation among the delegates. President Gompers was plainly surprised as he read the message to the convention and the delegates heard it as if they were dazed.

### Life Sentence for Girl's Attack.

Washington, Ind., Nov. 16.—Upon his written confession to the court that he had attacked the little daughter of Councilman A. C. Wise, John Eagle was sentenced to life in the state prison. Eagle said that a few hours before the commission of the crime he had drunk a quart of whisky.

### Berkeley Out for M. P.

London, Nov. 16.—Admiral Lord Charles Beresford, it is said, will be the leading candidate at the by-election in Portsmouth which will choose a successor in parliament to the late Sir John Baker.

### If you have hair, lose it and be brainy.

Cleveland, Ohio.—Hear ye! Hear ye! All you baldheads, come to order and give heed. Here in John D. home it has been observed that nature does not put marble tops on cheap furniture. The champion baldhead of the world, John D. Rockefeller, with all his millions refuses to spend a penny to cover up his marks of distinction. It is usually the man who does not want his character read like an open book, who has something to hide from the world who decides to wear false hair. So says the latest science.

Now, gentle friend, if you are bald, where and how much? Is your hair just getting a little thin on top? Are you bald just above the temples? Has the wind caused to whistling through the way locks on your crown? If so, get on your feet and give three cheers for science, for science has made you a man among men, or have brains. Having gray matter, who carves about the hair? Don't let your wife enjoin you into wearing something next to a rat. Do not allow your sweetheart to insist upon having your sweetheart to insist upon having some long silk curls to stroke in later years. Just tell them all to like it for you haven't anything that does not belong to you, and you have brains, brother, brains! Listen to what science says.

"Various emotions and qualities of mind take their birth in different parts of the brain. Hence just as one person varies in characteristics from another, so his brain is differently developed and his head differently shaped. The part of a man's brain which is most active in the region where the circulation is most stimulated. Other parts of the brain are comparatively cold and inactive. The greater the power the more the blood will be drawn to those areas, not as most persons suppose through the arteries and veins only but also through the placate, which dips down between the convolutions and which is an immediate cause of the transmission of arterial circulation to the convolutions. The baldness found in different parts of the head is really a study of cerebral importance. Sudden change of temperature in the convolutions of the brain caused often by sudden and excessive activity of certain organs

sometimes cause rupture of a capillary, succeeded by a slight extravasation of blood, which eventually occasions baldness.

"So the physiologist by recognizing the qualities belonging to different portions of the brain can determine, to a certain extent, the prevailing characteristics of a man by the nature of his baldness.

"The man who is bold of the crown of his head will be found to be a person of great independence of mind and inclined to be self-assertive. He will express his views regardless of opposition, and will be apt to be headstrong and domineering. He will be somewhat egotistical and occasionally dignified.

"Where the baldness extends to the sides of the crown the person will be extremely ambitious and desirous of winning popular applause. Vanity also enters into his countenance and super-sensitivity, providing the whole person with self-esteem and approbation, now are bald.

"Robert Ingersoll betrayed in his bold head decided independence and little disposition to regard the opinions of others. Popular sentiment has little effect upon a man of this stamp. "Baldness upon the top of the head, where there is no possibility of a part accompanying a sympathetic type of mind. All philanthropists and sympathetic people are not bald, but where baldness is found in this region these characteristics are sure to predominate. When there is no hair at all on top of the head the quality of respect for character and age is largely developed but not necessarily a regard for creeds and doctrines. Fine imagination and breadth of thought accompanies this type of baldness. Anthony Hope, the novelist, is a good example of this type.

"Baldness on the upper temples is a sign of great adaptability of character. The initiative talent is not prominent, but there is sufficient pliability of mind to allow the person to accommodate himself to the position. There is also insight which enables him to draw out the various characteristics of those about him. He can handle large subjects in a comprehensive manner. Such a person can bend circumstances and people to his will.

### WILL HE LAND THE FIGHT?

James J. Jeffries and James Coffroth of San Francisco, the fight promoters, in consultation in New York.

New York, Nov. 16.—Jim Coffroth has generally got what he goes after. In this case he has come to New York from San Francisco to bid for the Johnson-Jeffries fight and is prepared to make a liberal offer of the two contestants should they decide to use his open-air pavilion.

## MINE AGAIN AFIRE

Rescue Attempts at Cherry Shaft  
Futile, Openings Are  
Sealed.

## HOPE WEAKENS FOR MINERS

DIVERS IN SAFETY HELMETS DE-  
SCEND TO SECOND LEVEL, FIND  
NO BODIES, ARE DRIVEN BACK.

## TO FIRE WITH CHEMICALS

Barrel of Water Would Have Saved  
Mine, Says Inspector—Number  
Entombed Uncertain, It Ranges Be-  
tween 250 and 384.

Cherry, Ill., Nov. 16.—What little oxygen that remained in the extremities of the St. Paul mine was probably consumed by fire, fanned to fury by the mistaken efforts of the rescuers, and probably dealt certain death to the entombed men who may have been alive in the drifts.

Water failed the fire fighters at the moment they had mastered the flames. No pumps were on hand and in desperation the conference of experts ordered every opening closed. Paulie ruled the miners' families when they learned of the new disaster. Worked and worn by two days of heart-breaking suspense, women screamed threats of condemnation at the workers. They called them cowards. Then some threw themselves on the ground in wild hysteria, giving up over the hopes born by love.

Revived Fire Added Calamity.

Not only have 60 precious hours—each one of which may have meant life or death—been lost, but the revived fire is an added calamity no less serious than the first one.

Disagreements have arisen among the officials over the methods of rescue work. President A. R. Newnam of the state mining board wanted the mine sealed two days. He was overruled by the conference of inspectors and owners. Others think that every miner below was killed when the mine was sealed.

Blame for the renewal of the fire lies between the conference of experts and the company. The experts disagreeing among themselves, ordered the immense fan in the air shaft turned on. It sent a current of air through the second vein galleries and up the main shaft that turned the smouldering tunnels into curtains of flaming coal. Deadly gases, smoke and flames were unquestionably sent into the remote galleries, driving the fumes of the first fire still further and using up much of the precious oxygen that might have kept the imprisoned men alive until help could reach them.

Experts Descend Shaft.

When the main shaft was opened R. Y. Williams, the geological survey expert and his volunteer aids, Henry Smith, donned their oxygen helmets and went down. State Mine Inspector James Taylor went into the second vein nearly to the air shaft.

"I could have put out the fire then if buckets of water had been furnished me," he said. "But there was no pressure. The water couldn't be thrown three feet with the hose. Just a little pressure would have mastered the fire. It burned in three spots along the vein. We might have reached the men in an hour. How long will it take now? I wish I knew."

It took 42 hours to smother the first fire so the mine could be entered. It is not expected this one will take less. The fear of what may happen during that time has made the experts desperate.

It is the intention of the officials to reopen the mine today and fight the fire with chemicals, with the hope of reaching any person that may be alive in the remote air pockets. If it fails the mine will be sealed again and it may be a week, or even two weeks, before the trapped men can be released. Miners have been taken out alive after 60 days of imprisonment, but never where a second fire had broken out.

Funeral Cars Were Ready. Doctors, nurses, the hospital and several funeral cars were in readiness, so certain was everyone that men would be released. When the mine divers announced that the shaft was clear, when they came to the surface the first time, the crowd cheered and rushed through the ropes in their joy. Word spread to the women and children at home and all came expecting to know soon the fate of the men.

When the smoke came up in a first thin vapor it caused no alarm, but after the fan had turned for 15 minutes, forcing the cold fresh air into the mine, the vapor became a dense cloud. Fear stilled the exuberance of the crowd. The blackness that came from the mine settled over them and became a symbol of their new despair. From below came the quick danger signal from Williams and Smith.

The cage was raised at full speed. Little tongues of flames spouted it. The two holmested men jumped off, tore off the oxygen masks and sank down exhausted. It was their defeat. For an hour all the water available was poured into the mouth of the shaft. It was sprayed so that the smoke might be forced back to stifle the fire. That, too, failed.

Want Adds to Horror.

Want in the village of the living

added to the horror of the underground village of the dead; since the disaster the stricken families have been almost without food. They were not thinking of their own comforts. The supplies in the few stores were quickly exhausted by the thousands of visitors. Aid was slow in coming. But the children, who don't quite understand what death is, have been hungry. The cruel of the thousand orphans has made the mothers realize what the days and the years to come may mean because of some one's fault and six boxes of hay.

Supplies have begun to arrive. Unlimited credit has been given a village relief committee by President Bulling. To-day it is expected that the relief work will be organized and become effective. Large as the big disaster looms in the minds of all, there are many individual sorrows that make the awfulness of the tragedy still greater.

John Cibulski would have celebrated his first wedding anniversary to-morrow. He had asked his boss for a day off to celebrate the event with his young wife. Last night their baby was born. Neither mother nor child are expected to live.

In one home a husband and four sons are missing. In another there was a petty quarrel Saturday morning and the wife tells her story a hundred times a day to the crowd around the shaft.

Even romances are playing parts in the big drama. Nearly a dozen of the entombed men have for months been buying money orders at the Cherry post office and sending their wages to sweethearts in their fathertlands. Several are on their way to this country. They may come here with their little trousseaus expecting to be married, only to find their sweethearts missing, among the unidentified dead in public graves.

STEEL COMPANIES TO MERGE

Four Big Canadian Corporations Will Combine with Enormous Capital.

Montreal, Nov. 16.—The Herald says that, following the merger of the Dominion Steel and Iron Company and the Dominion Coal Company, which was practically consummated Saturday, negotiations will be begun for the merging of the Nova Scotia Steel and Coal Company and the Soo corporation in the same combine.

The four companies have a combined paid up capital of \$89,017,600. If the proposals go through the combined companies will be capitalized at \$150,000,000 and will be the biggest industrial corporation in Canada.

Wood Case Off Calendar.

New York, Nov. 16.—Mac C. Wood, indicted on charges of forgery and perjury in connection with the trial some months ago of her suit against ex-Senator Thomas C. Platt, whom she alleged she had married, did not appear when the case against her was called here. On request of the prosecution the case was marked off the calendar.

"A torch was fastened in the wall and some one carelessly pushed a car into it or near enough to it to set fire to the hay."

David W. Ross, secretary of the state board of labor statistics and member of the commission to investigate mining conditions in Illinois, is here. He expects to recommend legislative action as the result of his observations. Dr. Graham Taylor of Chicago, another member of the commission, is also here.

The number of the missing is still uncertain. Officers of the miners' union place it at 384. The company claims it is but 250. The mine inspectors, who have access to mine plans and the company books, freely state that more than 300 men are still in the mine. They hold out but faint hopes for any of the men and give it as their belief, based on previous disasters, that only a handful of the oldtimers are yet alive in air pockets in corners far from the shaft. They unite in calling it the worst disaster in mining history.

As a result of the disaster there are in this town of only a few thousand people, at least 1,000 orphans and 200 widows.

Extent of Fire Uncertain.

Reports of mine divers as to the extent of the fire were conflicting. Some said the blaze was confined to the stables, some reported it touched the bottom of the shaft. Smoke and darkness interfering with the view account for these discrepancies.

The consensus of opinion is that the fire is more serious than at first thought. It is said to have reached the timbers at the bottom of the hoisting shaft and to have jumped along the sides and roof of a passage connecting the air shaft with the hoisting shaft.

The burning and possible destruction of the timber will be a serious obstacle to resuming work, in the opinion of the state officials. There are no water works at the mine capable of supplying the necessary quantity of water.

Should the fire entirely destroy the shaft timbers the last communication with the bottom of the mine would be cut off for an indefinite time.

Pessimists and old maid find their solace in thinking of what might have been—conclusive evidence that neither will ever startle the advertising world.

SOCIETY OF EQUITY  
HOLDS CONVENTION

Delegates from Twenty-Three States  
Attend Meeting of Big Farmers' Organization.

Indianapolis, Ind., Nov. 16.—The seventh annual convention of the American Society of Equity with delegates from 23 states representing a membership of nearly half a million, began here today. A committee from the Co-operative Wholesale society of England was also present.

The reports of the officers show that the efforts of the society in the tobacco sections of Wisconsin and Kentucky have more than doubled the prices received by the growers. The winter and spring wheat growers are also well organized in the west and northwest. With a crop somewhat better than last year, yet hardly keeping pace with the increasing demand, the members are holding for \$1.15 per bushel. Hundreds of farmers' elevators have been built or acquired and the grain stored to await the price fixed by the society. Warehouse receipts are used at the banks to secure advances where quick money is needed.

The wool growers of Kentucky and Wisconsin organized their pools for the first time this year and obtained an advance of about seven cents over local buyers' prices. The potato growers are more demoralized this year than last because the organization of a potato department at Stevens Point, Wis., last May fell into inefficient hands. Several are on their way to this country. They may come here with their little trousseaus expecting to be married, only to find their sweethearts missing, among the unidentified dead in public graves.

Even romances are playing parts in the big drama. Nearly a dozen of the entombed men have for months been buying money orders at the Cherry post office and sending their wages to sweethearts in their fathertlands. Pessimists and old maid find their solace in thinking of what might have been—conclusive evidence that neither will ever startle the advertising world.

LATEST SPORT IN ENGLAND.  
LADIES GLIDING INTO THE WATER.

No Man is Stronger  
Than His Stomach

A strong man is strong all over. No man can be strong who is suffering from weak stomach with its consequent indigestion, or from some other disease of the stomach or associated organs, which impairs digestion and nutrition. For when the stomach is weak or diseased there is a loss of the nutrition contained in food, which is the source of all physical strength. When a man "doesn't feel just right," when he doesn't sleep well, has an uncomfortable feeling in the stomach after eating, is languid, nervous, irritable and depressed, he is losing the nutrition needed to make strength.

Such a man should use Dr. Pierce's Golden Medical Discovery. It cures diseases of the stomach and other organs of digestion and nutrition. It enriches the blood, invigorates the liver, strengthens the kidneys, nourishes the nerves, and so GIVES HEALTH AND STRENGTH TO THE WHOLE BODY.

You can't afford to accept a secret nostrum as a substitute for this non-alcoholic medicine of known composition, not even though the urgent dealer may thereby make a little bigger profit. Ingredients printed on wrapper.

## A Grand Moment.

"I am," "Father of Ben Jones?" "The same," "Then come with me." "I went with him to where there was a little crowd assembled and there I held Ben up by the ground. His nose was busted, teeth knocked out, eyes bloodshot and his shoulder out of joint, and he was so white and still that I asked, "Who's been killin' of my only son and where is the murderer?" "Then a man steps up and lays a hand on my shoulder and says, 'Your only son is just peachin', and nobody has murdered him. Gaze on him, old man, and remember this as the proudest minute of your life. He headed the center road, and the delivery of the North Pole didn't compare to it." "Are you Mr. Jones?" "I am."

"I am," "Father of Ben Jones?" "The same," "Then come with me."

"I am," "Father of Ben Jones?" "The same," "Then come with me."

"I went with him to where there was a little crowd assembled and there I held Ben up by the ground. His nose was busted, teeth knocked out, eyes bloodshot and his shoulder out of joint, and he was so white and still that I asked, "Who's been killin' of my only son and where is the murderer?" "Then a man steps up and lays a hand on my shoulder and says, 'Your only son is just peachin', and nobody has murdered him. Gaze on him, old man, and remember this as the proudest minute of your life. He headed the center road, and the delivery of the North Pole didn't compare to it." "Are you Mr. Jones?" "I am."

"I am," "Father of Ben Jones?" "The same," "Then come with me."

Type of Greek soldier, his wife and children.

Type of Greek soldier who threatens to bathe historic Athens in blood, the type of women and children for whom he fights and the king of Greece, who is facing one of the gravest crises of history. The Greek soldier is not unlike the warrior of any nation except in his fondness of display in the uniform he wears. He wears bright red fes, long blue tassels, short embroidered jackets,

tsaruklia of innumerable pleats and tsaruklia of red leather with tuft of red upon the tips of the upturned shoes.

Athens, Oct. 3.—The present revolt of the troops originated in the action of the government in response to the demands of the naval officers, agreeing to the suspension of promotions for five years and the abolition of certain naval posts and also consenting to introduce a navy purification bill. The Military league ac-

#### MILKPAIL HOLDER

Crosspiece Supports Pail on Knees of Person Milking.

There is no longer any danger of the cow kicking the milkpail over, so dairymen who have raised their price cannot give the excuse that there is any waste of the product from this source. Two New York men, from a place that sounds as if there were plenty of cows about, put their heads together and invented the milkpail holder shown in the illustration, thus preventing waste from permitting further breach of etiquette. The holder consists of a crossbar in two sec-

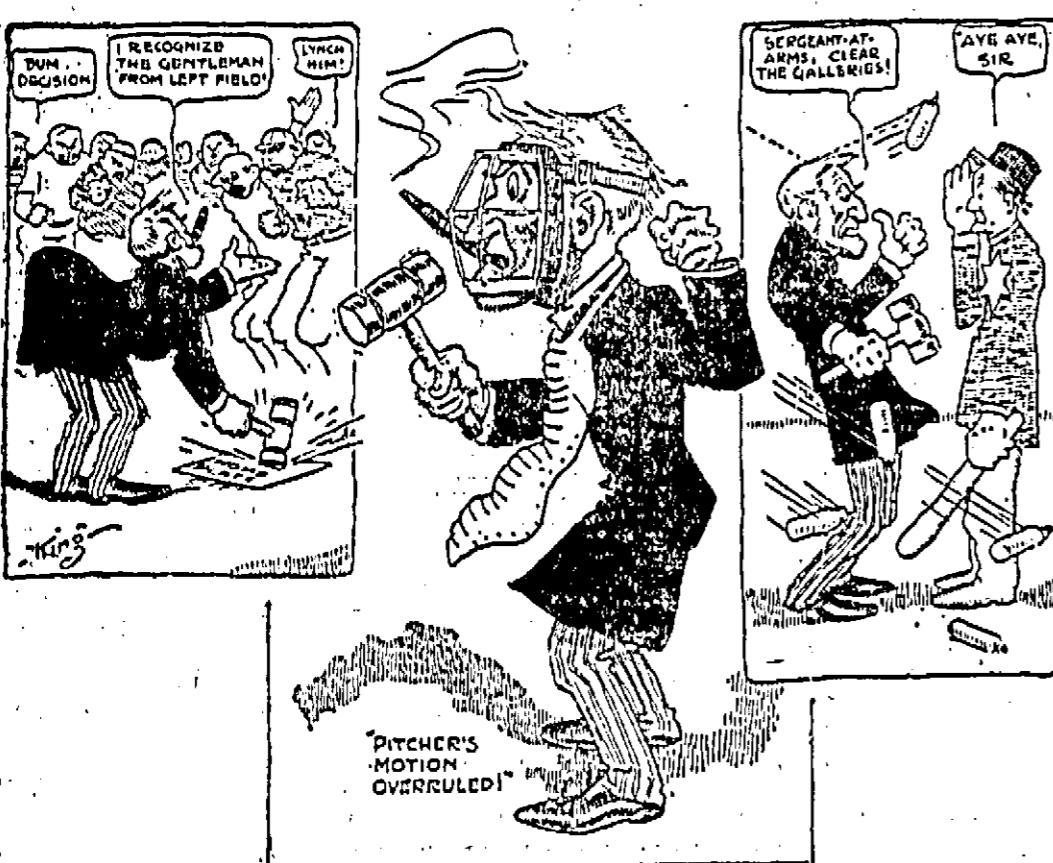

COW CAN'T KICK PAIL OVER.

ions, which are adjustable relatively to each other and can be made to fit the milk pail. When the bar is joined the best section encircles the rim of the milk pail and does not get in the way of the streams of milk, while chain and hooks hold the receptacle in its place. The milkpail, which holds the milk between his or her knees, has the crossbar bearing the weight, and is able to give all attention to the milking without keeping one eye on the milk pail.

#### Effect of Stumpage Dues.

The advance in stumpage dues on lumber cut on crown lands in Quebec province, Canada, for export is expected to occur in September, 1910, and will, says our consul at Sherbrooke, practically prohibit the shipping of pulp wood to the United States.

Advertising invites a closer scrutiny of your store and its methods. See that they will bear it.

UNCLE JOE, UMPIRE.

Danville, Ill., Nov. 11.—Our own "Uncle Joe" has become a real sport. Hitting the booze? No! Playing the jester? No. No. Smokin' cigarettes? Wrong again. Filting with strange shirts? Nixie. Not "Uncle Joe." He's not that kind of a sport. He's a real thoroughbred, be "Uncle Joe," and his morals are no worse or no better than they were twenty years ago. Now, what he really has done is to buy himself a bull club and hope to line up the base ball vote and run for president. Now Danville proposes to see that "Uncle Joe's" team gets a square deal. In role of umpire he is going to become the envy of the heroes of the brick dodging brigade of the National and American leagues. Begrudging on the part of the players is going to ceas to be a popular pastime on the diamond.

In the ranks of the insurgents there is untold joy. Already, though the news is less than twenty-four hours old, those men who are still smarting from the severe application of the Cannon rules at the last session of Congress are smiling with glee at the prospect. In their minds they picture him, in pad and mask, the inevitable long cigar protruding at the mouth through the bars, as he stands behind the catcher.

In imagination they see him standing solid and unperturbed in the midst of an angry mob of players, threatening him with fist and bat, on account of some close decision. They think they see him trying to apply the rules

off, "You're a mutt," and other choicer phrases? Will they? The insurgents answer with a smile.

"It is hardly possible 'Uncle Joe' will triumph over us and become speaker of the next congress," say the insurgents, "but when things grow dull in Washington and we feel the loss of his opposition, think of the consolation, even pleasure, that we will find as we look forward to the rift in the clouds when congress is over and we can journey down to Danville to see Uncle Joe umpire a baseball game."

Others ask whether it may not be that the speaker's baseball experience will have some effect on the rules of the house.

#### Talks on Snake Culture

No. 43—*The Beginner*

These little heart to heart talks are printed in the hope that a few young men may be induced to hand the ice

pitcher to John Barleycorn before it is永远ly too late. There is some hope for the festive youth who hates the thought of a drink in the morning, after a night of high revelry. If he can be reached at the psychological moment, he may be induced to eat it out and be an ornament to his set. But there isn't time for the jolly Good Fellow who goes in for the morning with such a smile on his face. He is the simple

## J.M. BOSTWICK & SONS.

### READY TO WEAR NEWS

#### That Will Be of Interest to Women Generally

This announcement is made to keep you informed regarding the excellent condition of our stock. We can say without fear of contradiction that assortments will be found at THE BIG STORE fully three times greater than can be seen elsewhere in Southern Wisconsin. WE WISH TO MAKE IT VERY PLAIN, TOO, that we are making EXCEPTIONALLY LOW PRICES, meeting all competition and doing just a little better than all other houses, class of garments considered.

Our garment department is visited by a great many women in the course of a week and judging from the very satisfactory sales we are having, we occupy a very enviable position, and the other stores simply have to take their hats off to THE BIG STORE.

If you have a garment want it would hardly seem wise not to see Janesville's Greatest Stock before buying.

### Our Showing of Suits

This department is wonderfully complete. There is hardly a shade that we cannot supply. We have kept adding to this stock and keeping it up to the top notch until now it presents the very best showing. We are making prices SO LOW that when women call and find out how reasonable our PRICES are they are truly surprised and pleased. Many of the SUITS are man tailored, others are trimmed and elaborate, and all good colors are represented. We have a remarkably good line of BROADCLOTH and NEW CHEVIOT SUITS, semi and tight fitting, made with shawl collars, long coats,

#### Handsome One Piece Dresses

Never was there a time when ladies could be supplied with handsome dresses and gowns at The Big Store better than now. We have smart designs for street wear, for afternoon and evening gowns. Materials are light panamas, serges, chiffon broadcloths and dingonals, mosselines, bengalines, silks.

One line worth particular mention is the swagger dresses of silk jersey braided top with plaited chiffon broadcloth skirts.

Any lady will find our assortments comprehensive enough to afford a most satisfactory selection.

#### Coats in Newest Styles

We are showing a big line of swell mixtures so very stylish in the large cities. These coats come in tight fitting, semi-fitting and rather loose styles, made with large storm collars, handsome large cuffs and immense buttons and trimmed in contrasting colors. They are storm coats and street coats combined, for autoing and driving, plain co-ed and Mayenne styles.

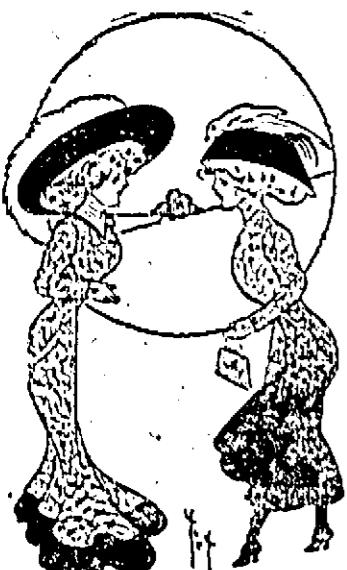

#### Children's Coats

Our stock of Children's Coats is unusually large this season and offers a variety of assortment and prices that far surpass anything else shown hereabouts. This season we include the junior coats in this stock and can fit any girl or miss. Sizes 4 years to 18 years. In colors, nothing missing.

JERSEY WAISTS, very new and attractive. Nice to wear over any skirt.

SEPARATE SKIRTS, in all new colors and in black, in panamas, voiles and silk.

OUR PRICES TALK. FEEL FREE TO COME AND LOOK—BUY OR NO BUY.

#### Hall & Sayles

are showing in their store window

#### Toilet Sets, Manicure Pieces, Desk Sets

and many small articles in silver that are particularly interesting for the holiday shopper.

They invite you to make selections while their stock is complete. Articles will be laid aside subject to call in the month of December.

"The Memory Lingers"

SPECIAL MEETING  
OF CITY COUNCILPermission Was Granted Jeweler to  
Hold an Auction—Milton Avenue  
Sewer Referred to  
Aldermen.After considerable argument pro  
and con, the eight aldermen who at-  
tended the special meeting called at  
the council chamber at 4 p. m. yes-  
terday decided by a vote of 6 to 2 to  
grant F. E. Williams permission to  
dispose of his jewelry stock now on  
hand, sales not to exceed \$1,500, at  
an auction sale to be held at the West  
Milwaukee street store November 17  
20 inclusive. Mr. Williams told the  
council that he wished to go west for  
the benefit of his health and that his  
lease of the store apartment he now  
occupies would expire on December 1.  
The question of accepting the Milton  
avenue sewer in District 11 was re-  
ferred to the city engineer and alder-  
men of the Second and Third wards,  
with instructions to inspect the work  
and propose condition of the thorough-  
fare and report at the meeting to be  
held next Monday evening.There is complaint from some quar-  
ters that Contractor Kinley has not  
left the surface of the street in  
proper condition.

## As It Should Be.

"Trusts beget monopolies," remarked  
the married philosopher. "For ex-  
ample?" queried the bachelor. "Well,"  
replied the married philosopher,  
"when a girl feels that she can trust  
a man she wants a monopoly on him."

## DAILY DIET HINTS

By DR. T. J. ALLEN  
Food Specialist.GASTRIC CATARRH FROM  
CANE SUGAR.Cane sugar, though a leading  
element of the diet of the aver-  
age American family, is a cause  
of gastric catarrh, biliousness  
and general auto-intoxication.  
Unless one is doing much phys-  
ical work, the less cane sugar  
taken the better. As a source  
of fruit sugar, which should  
form a large part of the diet,  
prunes, figs, apples, dates are  
preferable. The child's appetite  
for sugar is natural; but it  
should not be satisfied with  
cheap candy, but with the  
fruits named, honey, maple  
syrup and corn sugar or glu-  
cose. These are equally appro-  
priate for the adult who retains  
the normal appetite of child-  
hood. It has been observed  
that strong appetite for sugars  
and for alcohol do not exist to-  
gether.

## EMERALD GROVE.

Emerald Grove, Nov. 16.—John A.  
Jones of Marion, Iowa, made a short  
visit at the home of his brother last  
week.Mrs. Geo. Davis visited her daughter,  
Mrs. John Bradt, last week.The Mystic Workers will meet at  
the home of Mrs. J. A. McArthur on  
Tuesday evening, Nov. 23.The Jubilee quartette was greeted  
by a full house.Wm. Atkin of Whitewater spent a  
few days with his daughter, Mrs.  
H. Hanson and Mrs. J. A. McArthur  
last week.Mr. and Mrs. Edwin Martin of  
Harmony have moved on J. T. Barnes  
farm.A miscellaneous shower will be  
held at the home of Mrs. Davidson on  
Thursday afternoon of this week.  
Everybody is cordially invited.Mrs. Lizzie Hammer and son visited  
her parents, Mr. and Mrs. W. Bass,  
over Sunday.

## Nevertheless.

It is pretty hard to become enthu-  
siastic over a woman who has ceased  
to care what other women are wear-  
ing.

## Wise Man.

"I'm going to marry a girl ten  
years older than I am," says the Philo-  
sopher of Folly, "so that I can catch  
up with her by the time I'm fifty."

## Meeting Emergencies

For the chilly mornings and  
evenings of early Fall and Spring  
or the more bitter days of Win-  
ter in the house, in the bunga-  
low, any place where heat is  
needed in a hurry, thePERFECTION  
Oil Heater(Equipped with Smokeless Device)  
fully meets the emergency—  
never smokes—never goes  
wrong—in a class all by itself.

Infinite pains have been taken to make it perfect.

## Automatic Smokeless Device

Turn the wick high or low there's no smell—the auto-  
matic smokeless device prevents it—no smoke either—just  
a steady glowing heat.Requires little care—burns nine hours—indicator on  
brass font shows contents at a glance. The ONE PER-  
FECT Oil Heater. Various styles and finishes.

Housewives  
Are DelightedNo longer must they toil five hours over a  
hot cook stove and spend one-sixth of their  
week in the kitchen.They have now found a bread that is better  
than any they could make at home. For  
Yankee Bread is not made like ordinary bread.  
It is baked in live steam ovens superheated to  
340 degrees.These ovens retain the moisture rising from  
the bread. Then other steam is forced in under  
terrific pressure. The result is wonderful.  
Every particle of natural moisture is BAKED  
RIGHT INTO THE LOAF.And that is the most delicious loaf you ever  
tasted. It is moist, dainty and has a flavor un-  
equalled by any bread baked. We want you  
to serve one loaf on your table—begin to-  
morrow. All grocers have Yankee Bread or you  
can get it from our wagons which pass your  
house each day, at 5c a loaf, although it is  
worth more, because it is larger and three  
times as good as any other bread.BENNISON & LANE

menced the performance of his new  
duties last evening. He will be trans-  
ferred from branch to branch until he  
is familiar with a large portion of the  
entire railroad system, and his friends  
predict for him a brilliant career in  
this new line of endeavor.

**FOOD FOR A YEAR**

**JANESEVILLE WILL  
BE REPRESENTED  
AT CONSISTORY**

Masses from All Parts of the State  
Are Planning to Be in Milwaukee  
This Week.

This week in Milwaukee the thirty-  
third session of the Wisconsin consi-  
story for the purpose of conferring de-  
grees and the coordinate bodies, An-  
cient and Scottish Rite, is to be in  
session. Janesville will be repre-  
sented at the session by A. E. Matheson,  
William F. Carle, W. W. Wills, Stephen  
Hotelling, T. O. Howe, Fred Howe,  
Frank Howe, Joseph Trablin, W. W.  
Shorer and W. Farmer. These gentle-  
men will confer the Twenty-first de-  
gree.

The session will continue for four  
days, and be followed by a meeting  
of the Ancient Arabic order, Nobles  
of the Mystic Shrine, when many of  
the class of 1909 will be inducted into  
the mysteries of the orders. The ses-  
sions, including the meeting of the  
Wisconsin Lodge of Perfection, Wis-  
consin Council, Princes of Jerusalem;  
Wisconsin Chapter of Rose Croix, and  
Wisconsin Consistory, Valley of Mil-  
waukee, in addition to the Mystic  
Shrine, make Milwaukee the objective  
point for Wisconsin Masons this week.

Meetings will be held in the Masonic  
temple, Oneida and Jefferson  
streets, and all day on Monday  
masses were gathering there, groups  
passing in and out of the Jefferson  
street entrance continually. Degrees  
from the fourth to the thirty-second,  
will be conferred, and the consistory  
class will be a large one. Secretary  
James H. Barber was at his desk  
during the entire morning registering  
the members of the class as they ar-  
rived from different parts of the state.

Wisconsin Lodge of Perfection began  
its session at 1 o'clock in the Masonic temple. Charles  
E. Hammond presided during the con-  
ferring of the fourth degree, secret-  
ary master; Murray M. Hunter for the  
fifth degree, perfect master; Daniel  
McL. Miller for the sixth degree, in-  
fimate secretary; and Jesse C. Brad-  
ley for the ninth degree, master-elect  
of nine.

Mode was sung by the consistory  
quartet.

At 7:30 o'clock Monday night the  
Lodge of Perfection assembled to con-  
fer the fourteenth degree. Grand  
Elect Mason James S. Norris, three-  
potent master, will preside.

Tuesday was given over to the ses-  
sions of the Wisconsin Council, Prince-  
s of Jerusalem. The fifteenth and  
sixteenth degrees will be con-  
ferred. Wisconsin chapter of Rose  
Croix also meets on Tuesday, conferring  
the seventeenth and eighteenth  
degrees.

Wednesday and Thursday will be  
given over to the consistory meeting,  
Luther L. Caufy, commandery-chief,  
and during these sessions the remain-  
ing degrees will be conferred. The  
nineteenth degree will be conferred  
by brethren from Racine, and the  
twenty-first degree by Janesville Muni-  
cipal.

The meeting of the Mystic Shrine,  
which follows the sessions of the con-  
sistory and coordinate bodies, prom-  
ises to be a record breaker in the  
matter of attendance.

Prof. Monaghan is a fine orator and  
with witty stories and clearly drawn  
illustrations of the points he brought  
out made his speech exceedingly in-  
teresting. His talk was enthusiastically  
applauded by the students.

"America," said Professor Mon-  
aghan, "is God's country, and the man  
who has been abroad and has seen  
other countries can realize this best.  
A flag is a symbol of a promise and the  
tattered and sweatest of all is the  
American flag which symbolizes a land  
of opportunity."

The idea that opportunity comes to  
a man or woman, but once in their  
life was characterized as erroneous.  
"Opportunity is knocking all the  
time and is all around us. The great  
school in this world is experience.  
Graduation week is called Commencement  
because it is your entry into the  
school of hard knocks."

There are lamenting Jeromines  
standing on all the streets who tell  
what they would have done if they  
had started yesterday. My message to  
you is: Begin now and show tomorrow  
what would have been had you  
started yesterday. Don't let opportunity  
get away from you.

"What kind of boys is it that get  
hold of opportunities? It is the boys  
who know what they know that they  
know it."

China was pointed out by the profes-  
sor as the greatest possibility for  
American young men, on account of  
her great and undeveloped resources.

China's only real friend and the one  
whom she turns for help is America;  
the other nations have done their best  
to pilfer and rob her.

Speaking with regard to the possi-  
bility of a war with Japan, Professor  
Monaghan said that the young men  
of America would never have a chance  
to fight against Japanese. "England  
would never need them as she has had all  
the rows with the United States that  
she wants and the present set of Eng-  
lish statesmen are wise and far-seeing.  
Japan also knows better than to do  
anything of that kind. Should England  
and Japan wage war on the United  
States when the fighting ended there  
would be no English Empire nor a  
Japanese empire. To fight they must  
have resources and where would they  
get these? Japan is about the size  
of California and is situated on about  
four thousand volcanic islands which are  
not entirely cultivable. We have the  
resources to depend on. There is a  
possibility of developing the Mississip-  
pi and Missouri valley system so that  
the world could be supplied. If all  
the navies and armies of the world  
came, would not every boy, every  
young man, and even the old men be  
ready to shoulder the musket in de-  
fense of their country?"

Prof. Monaghan also spoke of the  
great natural resources of this country  
and how America had come to be  
one of the leading nations in the  
world. Statistics were given showing  
the great mineral and vegetable  
wealth of the United States.

Service was set forth by the speaker  
as the great question. "The boy  
who knows what he knows and does  
it, said he, 'Is the one that counts.' He  
spoke in glowing terms of the  
energy with which Magnus Swenson,  
of Madison, one of the regents of the  
University, who began his career as a  
blacksmith. The trouble with the  
high school graduate who starts to  
work, according to what he had been  
told by merchants, is that he wants  
what they wanted 'white shirt' jobs. They  
are afraid of work that will dirty their  
hands and soil their cuffs."

"It is your duty to help others.  
You have great responsibilities to  
assume when you go away from here.  
One of the great responsibilities is to  
do what you can to help others. And  
you can be a possessor," said Emerson.

"Little by little you will grow to a star."  
"My reply to the question, 'Am I my  
brother's keeper?' would be, 'You cer-  
tainly are. It is a world of Want,  
Work and Wealth but you haven't  
any right to wealth but to use it to  
help others. The great Gospel of life  
is giving."

This represents a fair ration  
for a man for a year.

But some people eat and eat  
and grow thinner. This means  
a defective digestion and unsatis-  
factory food. A large size bottle  
of Scott's Emulsion

equals in nourishing properties  
ten pounds of meat. Your Phy-  
sician can tell you how it does it.

**PROPOSED CHANGE  
OF MUCH INTEREST**

Filing of Petition for Special Election  
to Decide Rule by Commission  
Causes Many to Seek In-  
formation.

With the filing of the petition con-  
taining the names of six hundred and  
fifty residents of Janesville who de-  
sire the question of whether Janes-  
ville shall change its form of govern-  
ment from its present methods to  
that of a rule by commission much later  
than is shown in what has been done  
in other cities and many calls have  
been received at the library for refer-  
ence works on the subject. Miss  
Skavlem, the librarian, has prepared  
the following list which may be of  
use to those seeking information:

Another city for commission govern-  
ment, World's Work, June, 1909.  
Batter City government, Arena,  
Arena, 1909.

## WARREN TOPPAN, Lynn, Mass.

Cured of severe compound cold and cough by

Vinol

From Dec. 20, '08, to March 1, '09, I had three bad colds, one on top of the other. I got so weak I could hardly get around. Nothing seemed to help me until I began to take Vinol. The change was magic. Three bottles completely fixed that compound cold and stopped the terrible cough—and what surprises me most, at the same time it cured me of a severe stomach trouble that has bothered me for 20 years.

Vinol is certainly a wonderful medicine." Mr. Toppan is one of Lynn's most prominent and highly respected merchants, whose word is as good as his bond.

The reason Vinol is so successful in such cases is because it contains the two most world-famed tonics—the medicinal, strengthening, body-building elements of Cod Liver Oil and Tonic Iron.

Your Money Back If You Are Not Satisfied.

SMITH DRUG CO., Janesville.

## SEND US WORD

Subscribers to The Gazette will confer a favor upon the publishers by sending word immediately to this office of any irregularity in delivery of paper, any error in the dating of subscription—in fact reporting anything that is not correct regarding delivery of paper.

During the recent contest there were many opportunities for mistakes and it is the wish of the paper to rectify any error which may have been made at that time.

GAZETTE PRINTING CO.

## READ GAZETTE WANT ADS

From present indications there is about to be the usual football fatality.

## Automatic Book Vendor.

An automatic book vending machine has been devised abroad by which it is possible to hire a book for a short period or to buy it. The machine holds about a dozen or fifteen books, which are arranged so as to display their titles. Its operation is controlled by two slots, one of which represents the value of the book and the other to hire. In order to secure the volume the required amount must be placed in each slot, and when the book has been read and returned, the amount representing the value is returned automatically.

## Electric Glue Heater.

An electric glue heater has been put on the market which is said to melt glue in 30 minutes, and to keep it at a temperature of 150 degrees for several hours after the current has been switched off.

## A Family Medicine Without Alcohol

Without daily action of the bowels poisonous products must be absorbed. Then you have impure blood, biliousness, headache. Ask your doctor about Ayer's Pills for constipation.

Ask your doctor if a family medicine, like Ayer's Sarsaparilla, is not vastly better without alcohol than with it. Ask him the difference between a stimulant and a tonic. Ask him about Ayer's non-alcoholic Sarsaparilla as a strong tonic for the weak. Ask him if it makes rich, red blood. Ask him if he has anything better suited to your case. Do as he says.

J. C. AYER COMPANY, Lowell, Mass.

## FORTY YEARS AGO

Janesville Daily Gazette, November 16, 1869.—A Mystery.—Who Can Solve It?—It will be recalled by the readers of the Gazette that an accident was given some two or three weeks since of the burning of the barn of William C. James near Lima. After the fire a carcass was found which was supposed to be that of a calf which had been confined in the building. This was thrown over a fence and the hogs stripped it, when it was discovered that they were human bones. Search was made in the ashes for any articles which might furnish a clue to the tragedy and resulted in the disclosure of a revolver, a heavy silver ring, and two pocket knives.

The bones were gathered up and taken to Milton, where an inquest was held, but no light in regard to the matter was elicited. Was it a murder and was this method taken to conceal the crime, or was it an accident?

Jotting—A house in the Second Ward, formerly occupied by Mr. Hines, was burned last night. It was valued at \$5; no insurance.

After tomorrow there will be no school in Janesville until Monday. President Mitchell sends word that as soon as the frost is out of the ground work will commence on a new passenger depot for this city, and that it will be a good one, too.

The names of four prominent aviators are indicated here. Who are they?

## Letters in the Bible.

The total number of letters in the Bible is computed by an authority to be 3,566,480.

## DOES THIS MEAN YOU?

Indigestion, sour stomach, constipation—then headache, backache and a general miserable feeling. Do you know that the pleasant herb tea, Jane's Family Medicine will remove all these trouble almost immediately? Just a spoonful now and again, a cup of tea today at any druggist's or dealer's and you will be glad we told you.
